SUMMARY

To work as a Frontend Developer, utilizing my experience in developing, designing, and maintaining solutions to meet individual requirements. I aim to be part of a team of driven individuals committed to the company's success while demonstrating excellent time management and punctuality in achieving goals.

SKILLS

-**Frontend** : JavaScript, React, CSS3, Tailwind, Bootstrap, HTML5, Next.JS

-**Backend** : Express JS, Laravel, PHP, Node JS, Mongoose

-**Database** : MongoDB, MySQL

-**Tools** : Firebase, Git, GitHub, VS Code, Vercel, Netlify, Postman, XAMMP, Figma, Pixso, VM, Ubuntu

EXPERIENCE

• Software Engineer Intern | Reddot Digital | March, 2025 - Present

Contributing to innovative software solutions for business process management and workflow automation.

PROJECTS

• QuickGig- Micro-task & Earning Platform : Live Client side Server side

- Developed using JavaScript, React, Express JS, Tailwind, Daisy UI, MongoDB, Tanstack query etc.
- QuickGig is a micro-task platform where users earn by completing tasks or hire workers easily. It offers role-based dashboards, secure payments, and real-time task management."

• PlateShare - A Food donation management system : Live Client side Server side

- Developed using JavaScript, React, Express JS, Tailwind, MongoDB etc.
- A platform facilitating efficient food donation by connecting donors and recipients, with features like secure authentication, donation posting, and location-based search. Led end-to-end development, optimizing user experience through seamless frontend and backend integration.

• GyanFlow - An online learning management system (Group): Live Client side Server side

- Developed using JavaScript, React, Express JS, Tailwind, Shadcn Ui, MongoDB, Mongoose, Redux Toolkit etc.
- Developed a scalable online learning platform with live classes, quizzes, and interactive discussions using MVC architecture. Integrated ZegoCloud for streaming and SSLCommerze for payments, ensuring a mobile-responsive design. Included an admin dashboard for managing users, courses, and announcements.
